400 lbs of force!

DESCRIPTION

Robust and powerful, pneumatic operated fiber blowing machine designed for single cables and for relining of multiple micro ducts. **Configuration can be made for 0.16"–1.14" cable, and duct dimensions 10–22mm micro duct & 0.75"–2.00" standard conduit.** The unique Joystick controller and the agile motors secure an optimal control of the installation. With an anodized aluminum construction, the machine is lightweight but still very strong.

- Pneumatic operation, double motors.
- Gentle operation with long contact surface on the cable.
- Display for speed, distance and pressure in duct.
- Max. speed 65 m/min (164 ft./min), max pushing force on cable 1800 N (400 lbf).
- Adjustable clamping force.
- Option of sub-ducting kit makes most configurations possible: 7x7/3.5 mm or 4x14/10 mm. The machine can be carried out in several small microducts and, for example, in a 40 mm (1.75") tube simultaneously.
- Works with JetLogger.
- Joystick Controller with forward and reverse function.
